CD 1604 MP3

RDS Tuner CD MP3 Player

Softkey Operation

Softkey operation provides an easy way for direct access to the most important functions. The advanced three-button menu system with current status and function selection appears on the display for visual confirmation.

Switchable Key Illumination

For better car integration the user can choose between 3 different key illuminations (red/green/mixture of red+green)

Software Access Menu (SAM)

"Software Access Menu" is an easy way to personalize your car radio according to your choice and install all possible optional applications.

Sound Presets

With the 4 different sound presets (Flat-Class-Pop-Rock) the user can adjust the sound frequency to his preferred music genre.

Bass Boost System (BBS)

Boosts the bass out of the set! This function is selected via a direct key access. 3 levels of effect can be chosen according to your preference.

2-Channel 2V Preamp Out

The 2-channel line out multiplies the sound power combinations and pre-amplifier connections. In order to optimize at its maximum the signal to noise ratio and increase the dynamic, outputs are supplied at 2V.

Telephone In/Mute

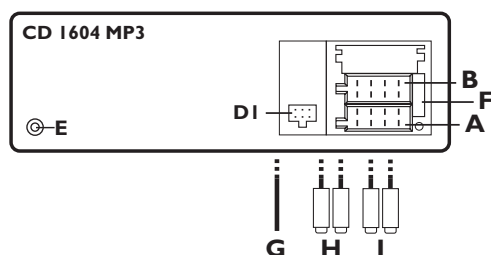

The Phone In connection allows for safer driving whilst corresponding to many country's legislation. Whats more, you gain improved sound quality through front loudspeakers and a handsfree kit can be connected.

Aux In

With the Aux In you can connect additional audio sources to your car hifi system.

Detachable Flipdown Front

For theft protection, the complete front of this car radio is detachable and flips down to access the CD drive for inserting and changing a CD.
